11B INFANTRYMAN, SPECIAL FORCES

The Special Forces 11B Infantryman has a wide range of duties requiring a number of specialized skills. A foreign language skill is required in the performance of a number of his duties and tasks.

Language Requirements

The Special Forces 11B Infantryman uses language in face-to-face conversation for basic survival, social intercouse with members of the G Force, instructing, advising, and occasionally commanding. The highest priority language need falls into the categories of instructing and advising. Aside from immediate survival language, the capability to communicate as an instructor is paramount.

Because of the nature of unconventional warfare, the 11B Infantryman, as an instructor, tailors the content, organization, and training techniques to meet the unique characteristics of his group. The training covers the basic tasks performed by the combat soldier, particularly as applied to reconnaisaance and combat patrols. The emphasis is a "hands-on" approach to training. Platform instruction is the exception; not the rule.

Communicative Tasks

The priority job tasks are concerned with training the G Force in the use of basic infantry weapons, small-group tactics, reconnaissance patrols, combat patrols, and ambushes. These job tasks use two communicative activities: "DEMONSTRATES" and "TEACHES".

"DEMONSTRATES" is specific "hands-on" training, usually with physical equipment or weapons. In terms of grammar and syntax, the language requirement for

"DEMONSTRATES" is less complex than "TEACHES". "TEACHES" demands a higher capability in verbal communication to accomplish the training task. More abstract or symbolic knowledge underlies the skill in which the G Force member is trained.

These two communicative activities, "DEMONSTRATES" and "TEACHES" form the basic organizational scheme for the Enabling Objectives (EOs). When the Terminal Skill Objectives (TSOs) are mapped on the EOs, either "DEMONSTRATES" or "TEACHES" provide organized and developed communicative strategies leading to mastery of the specific TSOs.

Language Functions

The language functions critical to communicative task performance are referenced in the TSOs and the EOs. Example elements in Russian are listed in the Russian Functions Catalog.

Zeroing the Rifle			
The instructor will teach the Guerilla how to battlesight zero his rifle. This narrative is based on the characteristics of the M16. It requires the instructor to use a standard 25-meter target or equivalent. Other rifles may require different techniques, but the principles are the same.			The student (as a job holder) will spend most of his time assisting the learner in developing the psychomotor skill of marksmanship. Therefore, EO C.7.4 Supervising Student Performance and EO C.7.5 Evaluating Performance are the "key" enabling objectives in the successful performance of this TSO.
The instructor explains the target dimensions, windage rule, and aiming point.
